

Capture Footprints with the App

START

1 Download the App

Epicollect5 for Android, iPhone, & iPad

2 Add Project

WildTrack Expert Users*

*By invitation only, for location safety. Invited members can access www.wildtrack.ml to see how AI classifies the images.

3 Register Project

Send gmail address to info@wildtrack.org

If you do not have gmail, let us know and we'll send you a link to register.

4 Sign in and read instructions

Be sure to scroll down on each page and select Next after each page.

5 'Wild' and GPS Location

Enter 'wild' where you are collecting. Scroll down to refresh GPS location

6

Select Species

Scroll down for 'other' or 'unknown'

7 Add Trail Information

First trail of day is #1
Second trail #2

Start fresh on new day
Note if footprints are from one or more than one animal. Scroll down and answer as many questions as you can.

8

Follow instructions & take footprint images

Add a branch for each footprint

9 Add comments or questions

If you have any

9

FINISH

10

Save & Upload

Save Branch
Save Entry
Upload data & photo separately
